

SOHAM KULKARNI

Nashik, India | soham18262@gmail.com | 9356561034 | github.com/soham1826 | [Linkedln](#)

TECHNICAL SKILLS

AI & LLM: Python LangChain, LangGraph, RAG Pipelines, Prompt Engineering, Agentic Workflows, Google Gemini, OpenAI APIs, Ollama (LLaMA3), Multi-Agent Systems

ML & Data: Pandas, NumPy, Scikit-Learn, Embeddings, Vector Search

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, BullMQ, Event-Driven Architecture

Frontend: Next.js, React.js, Redux, Tailwind CSS, TypeScript, JavaScript

Databases: MongoDB, PostgreSQL, MySQL, NeonDB (Serverless Postgres), Prisma ORM

Cloud & DevOps: AWS, GCP, Docker, Git, GitHub

WORK EXPERIENCE

Software Developer | [Winjit Technologies](#)

Sep 2025 – Present

- Architected and deployed a production-grade Automated Communication & Notification System using event-driven design (BullMQ workers, MongoDB, PostgreSQL), powering multi-channel delivery across email, SMS, push, and in-app notifications.
- Engineered Generative AI-powered internal tools leveraging LLM APIs to automate repetitive workflows, reducing manual effort and improving cross-team operational efficiency.
- Designed a dual-database strategy (MongoDB for config/logs, PostgreSQL for domain reads) with a Segment Registry pattern for dynamic audience targeting, decoupling business logic from raw query generation.
- Built and maintained scalable REST APIs and backend services supporting enterprise-grade web applications, handling end-to-end data management and system integrations.

Full Stack Developer Intern | [Connect Link](#)

Oct 2023 – Jan 2024

- Delivered 5 core product features for a social media platform using Next.js, Redux, and Tailwind CSS, accelerating the development timeline by 52%.
- Designed and integrated RESTful APIs with Node.js and Express.js, achieving a 20% improvement in API response efficiency through query optimization and middleware refinement.

Developer Virtual Intern | [Salesforce](#)

Oct 2022 – Dec 2022

- Built 2 custom Lightning Web Components (LWC) using Apex and JavaScript, streamlining data entry workflows and reducing manual input overhead.
- Earned the Apex Specialist Super Badge by completing advanced projects in triggers, SOQL optimization, and Apex class architecture.

PROJECTS

[Reddit Persona Generator](#) | *Python, Google Gemini API, PRAW, RAG, Prompt Engineering*

- Developed a Python tool that scrapes Reddit user activity via PRAW and applies RAG-style retrieval with Google Gemini LLM to generate citation-backed user personas for behavioral research.
- Designed a modular, secure architecture with environment-based API key management and automated persona report generation, optimising the LLM prompt pipeline for accurate and structured outputs.

[Summarix – AI PDF Summariser](#) | *Next.js 15, LangChain, Google Gemini, NeonDB, Clerk, Stripe, Tailwind CSS*

- Built an end-to-end SaaS application where users upload PDFs and receive AI-generated, emoji-enriched markdown summaries powered by LangChain and Google Gemini.
- Integrated Clerk authentication, Stripe subscription payments, and NeonDB (serverless Postgres) with a full dashboard for summary management — deployed on Vercel.

EDUCATION

B.E. Computer Engineering – CGPA: 9.12

Jun 2021 – Jun 2025

Sandip Institute of Technology and Research Center, Nashik

ACHIEVEMENTS & LEADERSHIP

- Chairperson, IEEE-SITRC (2024–2025); Active AI/ML Volunteer, Google Developer Student Club (GDSC) SITRC.
- 1st Prize, Smart India Hackathon (Internal Round) — recognised for innovative full-stack solution development.
- 2nd Prize, Nash-Lon Hackover by HackerRank — competitive hackathon demonstrating rapid prototyping skills.
