

SOHAM KULKARNI

Nashik, India | soham18262@gmail.com | 9356561034 | github.com/soham1826 | [LinkedIn](#)

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML, CSS, TypeScript, JavaScript

Backend & APIs: Node.js, Express.js, REST API Design, Python, FastAPI, BullMQ, Event-Driven Architecture, Microservices

Databases: MongoDB, PostgreSQL, MySQL, NeonDB (Serverless Postgres), Prisma ORM, Query Optimisation

Cloud & DevOps: AWS, GCP, Docker, Git, GitHub, CI/CD Pipelines

Auth & Integrations: Clerk, JWT, Stripe Payments, WebSockets, Redis Pub/Sub

AI & Tooling: LangChain, LangGraph, Google Gemini API, RAG Pipelines, Prompt Engineering

WORK EXPERIENCE

Software Developer | [Winjit Technologies](#)

Sep 2025 – Present

- Designed and developed scalable full stack web applications across React/Next.js frontends and Node.js/Express backends, handling end-to-end data flow across MongoDB and PostgreSQL in multi-service enterprise environments.
- Architected an event-driven Automated Communication & Notification System using BullMQ worker pipelines, dual-database strategy (MongoDB for config/logs, PostgreSQL for domain reads), and REST APIs consumed by frontend and third-party services.
- Implemented a dynamic audience targeting module using a Segment Registry pattern — decoupling frontend configuration from backend query execution, reducing fragility and enabling non-technical users to configure recipients without raw SQL exposure.
- Built and deployed Generative AI-powered internal tools integrating LLM APIs into existing product workflows, improving team productivity and reducing manual processing overhead across operations.

Full Stack Developer Intern | [Connect Link](#)

Oct 2023 – Jan 2024

- Delivered 5 core features end-to-end for a social media platform — building responsive React/Next.js UI components with Redux state management and connecting them to Node.js/Express REST APIs, accelerating the project timeline by 52%.
- Optimised RESTful API performance by 20% through query refinement, response shaping, and middleware improvements, reducing frontend load times and improving overall user experience.

Developer Virtual Intern | [Salesforce](#)

Oct 2022 – Dec 2022

- Developed 2 custom Lightning Web Components (LWC) using Apex and JavaScript, streamlining data entry workflows and reducing manual input for internal teams.
- Earned the Apex Specialist Super Badge by completing advanced projects covering triggers, SOQL query optimisation, and Apex class architecture.

PROJECTS

[Summarix – AI PDF Summariser](#) | Next.js 15, React 19, Node.js, LangChain, Google Gemini, NeonDB (PostgreSQL), Clerk, Stripe, Tailwind CSS

- Built a full stack SaaS application from scratch — Next.js frontend with a responsive Tailwind dashboard, server actions handling PDF upload and processing, and a LangChain + Gemini AI pipeline generating structured markdown summaries.
- Integrated Clerk for authentication, Stripe for subscription and payment management, and NeonDB (serverless PostgreSQL) for persistent data — deployed on Vercel with environment-based config management and scalable serverless architecture.

[Reddit Persona Generator](#) | Python, Google Gemini API, PRAW, REST, Prompt Engineering

- Built a backend pipeline that scrapes Reddit activity via PRAW, processes it through a Gemini LLM prompt chain, and outputs citation-backed structured persona reports — demonstrating clean API integration and modular service design.

EDUCATION

B.E. Computer Engineering – CGPA: 9.12

Jun 2021 – Jun 2025

Sandip Institute of Technology and Research Center, Nashik

ACHIEVEMENTS & LEADERSHIP

- Chairperson, IEEE-SITRC (2024–2025); Active AI/ML Volunteer, Google Developer Student Club (GDSC) SITRC.
- 1st Prize, Smart India Hackathon (Internal Round) — recognised for full stack solution development under competition constraints.
- 2nd Prize, Nash-Lon Hackover by HackerRank — rapid prototyping across frontend and backend in a competitive hackathon setting.
